

Improve risk controls
Reduce operational cost
Scale your business

Protecting your Receivables Finance business

Lenvi Riskfactor is the leading portfolio monitoring software for the global receivables finance industry.

Receivables finance lenders face two critical challenges:

- Early detection of fraud and bad debt,
- The cost of managing a portfolio.

Lenvi Riskfactor is the ultimate solution to address these issues, offering advanced tools to safeguard your business, and unlock valuable customer insights for both your risk and client managers to better manage your portfolio.

How Lenvi Riskfactor helps you

Managing a receivables finance portfolio is time consuming, costly, often involving cumbersome manual processes. Lenvi Riskfactor provides your team with the tools to automate processes, and work in a more efficient way whilst enhancing risk controls.

With Lenvi's Riskfactor software your teams can:

Early detection of fraud & bad debt

Spot fraud and unusual activity earlier with instant alerts to changes in client and/or debtor behaviour.

Focus on growth

Eliminate manual processes to create more time for value-add tasks and increased customer engagement to help drive portfolio growth.

Gain deeper insights

With all data in one place, make better, more informed decisions with timely data and in-depth insights across your entire client and debtor base.

Enhance reporting capabilities

Comprehensive and configurable suite of reports to assist monitoring and reporting over the portfolio to benefit decision making

Take a risk-based approach

Easily identify your highest-risk facilities, giving you more time to focus on your priority accounts as well as growing your portfolio.

Alleviate compliance pressures

Effortlessly adhere to risk policies and compliance requirements, with all activity recorded for a detailed audit trail.

In doing so, giving them time back to focus on providing quality client service to your portfolios. What we offer:

Industry leading metrics

Our metrics are consistently proven to detect fraud and bad debt at the earliest possible stages.

Comprehensive alert management

Lenvi Riskfactor automatically calculates key risk metrics across your clients and debtors.

Best-in-class MI and reporting

All reporting can be distributed quickly in accessible formats for all relevant stakeholders.

Dashboard and workflow capabilities

Clear oversight of team tasks in one central location, helping to manage your resources and focus time where it counts.

Audits and surveys

Improve audit trails, track workflows, improve reporting and gain deeper insight.

Covenant monitoring

Be alerted to unusual behaviour from clients and know instantly when covenants are breached.

"Riskfactor supports our operational capacity and provides significant efficiency gains for us. It provides another set of eyes for our risk and relationship manager teams. Riskfactor is an integral part of our day-to-day risk management and operations – I don't know how we would manage without it!"

MONEY

How Lenvi Riskfactor works

Lenvi Riskfactor seamlessly integrates with your core operation platform, whether it's an in-house system, or 3rd party platforms.

We partner with some of the leading platforms in receivables finance lending:

solifi

c o d i x
