

End-to-end monitoring with Lenvi Riskfactor and ANACONDA

Lenvi and e-trusco have joined forces to provide receivables finance and factoring clients with an integrated, end-to-end solution for invoice and portfolio risk monitoring.

Through seamless data-sharing, joint clients can now use Lenvi Riskfactor's metrics to enhance the sensitivity of the ANACONDA risk index, meaning you can:

- Reduce manual workload associated with invoice assessment.
- Investigate suspicious activities and automate verification processes.

Delivering measurable results

20%+

reduction in
verification team
workload, increasing
operational efficiency

Zero IT resource
required - our
systems are securely
connected

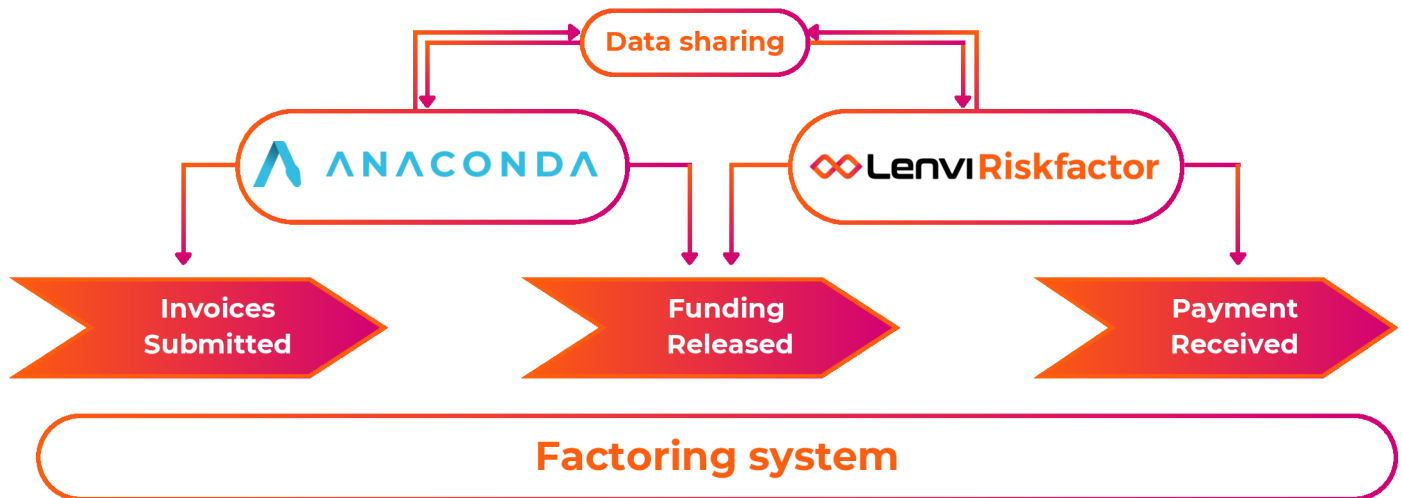

Enhanced fraud detection
and fewer false positives
by combining robust risk
scores with invoice
monitoring

Automated, data-driven
decision-making that
supports compliance
and due diligence

Our combined solution

- **ANACONDA's** intelligent algorithms analyse invoices and payment data, identifying anomalies and automating verification processes.
- **Lenvi Riskfactor** complements this with continuous portfolio risk monitoring from the point of funding release.
- Together creating a comprehensive risk management suite, enhanced by **data sharing** and **combined metrics**.

"As the two leading solutions in factoring risk management, Lenvi Riskfactor and ANACONDA have joined forces to deliver a more powerful, integrated approach. Together enhancing invoice verification and portfolio risk monitoring."

Falko Junge - Lenvi Riskfactor, Business Director

"Our partnership with Lenvi Riskfactor is already elevating our market-leading invoice verification by enabling smarter data sharing. Together, we're raising the bar for risk and fraud prevention in receivables finance and factoring."

Dr. Wolfgang Goldammer, Co-founder & CEO - e-trusco
